Global Trust Construction is a full service Water/Wastewater Systems & Water/Wastewater Treatment Design/Construction Group located in Kabul.

GTC consists of professional & specialist firms in ranging fields operating under Global Trust Construction, Consulting and Engineering Company; a Kabul based firm reputed in providing best quality, design and construction services for the past 6 years in Afghanistan.

We have been providing full line Professional Design/Build Services across Afghanistan, for a number of reputed clients (i.e. USACE AED, USAID, Gov. of Afghanistan, AFCEE; and have also worked leading firms such as DynCorp Int., Technologists Inc., AMEC Int.)

We offer comprehensive design services to architects, owners, developers and contractors and have extensive experience with all types of commercial and domestic projects including military compounds and bases, buildings, parking garages, recreation facilities, schools, warehouses, medical buildings, barracks, DFAC's, fire oppression and sprinkler systems and utilities. Our personnel possess advanced degrees in environmental science and engineering, water/wastewater systems, and solid waste management, and have worked on environmental projects throughout the Afghanistan.

We also offer unique design services in the areas of renovation/rehabilitation, due diligence reports for all types of building structures, tunnel formed concrete structures, and other special projects. We believe in ultimate client satisfaction and our efforts are supported by our professional staff of engineers, designers and management experts. We pride ourselves on technical excellence. Our employees work on integrated project teams lead by **GTC** Management. This teamwork ensures that the highest level of technical excellence and innovative

engineering solutions are delivered to our clients, and provides a stimulating learning experience for our staff. We continually share our combined knowledge and practical experience throughout the firm.

GTC is an expert Construction firm in Afghanistan with a diverse background and a common goal. We are known for construction projects such as bridges, transit projects, designs, renovations, military bases, power plants, etc. Global Trust Construction is a general contracting
