<b>Mazar-e-Sharif</b>	RMTC As built drawing project	
<b>Client</b>	ASSIST International corporation	
<b>Contact</b>	<a href="mailto:herai.alpha@gmail.com">herai.alpha@gmail.com</a>	
<b>Funded by</b>	USACE	
<b>Description of Works</b>	It consisted of the construction of facilities for a total of 3,000 personnel. This project is built on over 222,000 Sqm of land and included demining on sites and building over 6,500 LM of force protection stone walls. There were a total of 52 buildings; one and two story facilities constructed from our unique 3-D building system built up to 25,000 m2. This allowed us to meet the tight schedule and the high quality requirement of AED, in spite of the security .challenges on most of these sites

<b>Description of Works</b>	This project consists of the design and construction of facilities for accommodation in the Kabul Province of Afghanistan. Project work scope includes the management, planning, design; material procurement, labor, and equipment required to site adapt and construct all utilities, vehicular access, buildings, force protection measures, and site security, as well as de-mining activities and other ancillary features. As a Prim contractor GTCC assumed construction operations responsibilities that included supplies and materials acquisition, management, installation, construction quality control, job site health and safety and environmental management. In addition, GTCC implemented comprehensive project management that included the schedule control, financial control, and contract administration necessary to complete the project on time, within budget, without any recordable safety incidents or time lost to injury. In addition to managing the project and building the structures, GTCC was responsible for installing the electrical, plumbing, and HVAC infrastructure of the buildings using our in-house electricians, plumbers, and mechanical team. To date, there has been no lost time to injury and no recordable .accidents
